Candidate: Patrick Creighton

Office Running for: Franklin County Coroner

Candidate Summary: My name is Patrick Creighton, and I am running for Coroner because I believe Franklin County deserves more from our leaders.

I have six years of experience in the field of biomedical research investigating the safety and efficacy of medical devices and pharmaceuticals. This has given me a strong background in both medical science as well as legal compliance.

But being a successful Coroner is so much more than investigating and reporting deaths. A successful Coroner needs to proactively participate in solving issues facing our community - issues like rising overdose deaths and declining mental health leading to suicides.

Our community needs leaders that see beyond what they are legally required to do and look at what they are morally obligated to do. As Coroner, I will be that leader. I will prioritize community involvement in the Coroner's office and proactively reach out to community partners to ensure Franklin County has every tool possible to make everyone's lives better.

I'm proud to say that I have been endorsed by 314 Action, an organization which works to elect scientists and other candidates with STEM backgrounds.

314 Action's mission is to recruit, train, and elect scientists and other Science, Technology, Engineering, and Mathematics (STEM) leaders to public office. Since 2016, with nationwide grassroots-driven support, 314 Action helped elect ten scientists to the U.S. House of Representatives, three to the U.S. Senate, and more than 100 others to state and local offices across the United States. <https://314action.org>
